AIS Services LLC Celebrates 4 year Anniversary with Third-Party Collection Services Launch

SAN DIEGO, September 1, 2009 -- AIS Services, LLC announced today it will offer third-party collection services to a select cadre of lenders and debt buyers in celebration of its fourth successful year in the ARM Industry having serviced more than 5,000,000 accounts during this periodic of meteoric growth.

AIS Services, LLC, led by industry veterans Peter Bennett and Sergio Seplovich, is a nationally-licensed, full-service consumer receivable asset management company that focuses on the acquisition, management, recovery and resale of under and non-performing portfolios of consumer debt. AIS Services, LLC was originally formed to provide collection and administrative services to debt buyers. Now, in celebration of its upcoming four-year anniversary this October, the nationally-licensed collection agency has extended its services to offer these to both lenders and debt buyers.

Despite the ongoing recession in the US and resultant rise in charged-off consumer debt, numerous competing debt buyers and contingency collection services companies have either shut down or severely scaled back operations. AIS has instead successfully grown its client base and continued to implement rigorous quality measures to increase liquidation rates for its clients.

AIS Services' affiliation with the substantial debt buyer Applied Income Sciences has required it to develop the very highest standards for work-effort, reporting and collections tactics. Additionally, the countercyclical nature of debt buying, which has blossomed during the recent downturn has helped to further strengthen AIS operations. AIS Services credits its commitment to treating each account holder as a "client" instead of as a "debtor" as a key component to their success. As a result of this pledge, AIS Services enjoys an "A" rating with the Better Business Bureau, a mark achieved by few in this industry.

"As a 4 year-old privately held "boutique-style" agency, we have some advantages compared to our competitors, not the least being that we focus on profits rather than just accumulating volume", said, Sergio Seplovich, Managing Director. "We have a very robust agency network that services our purchased portfolios, and we are accustomed to competing against them each month for market share. We now look forward to extending the scope of these services to a handful of select, key clients and to provide them with the highest liquidation rates possible for their portfolios and a offer the same focus and attention to their needs".

AIS Services, LLC has positioned itself to continue exceeding its client's expectations in the ARM industry through its investment in collection and dialer technologies, partnering with a group of broad and balanced cutting-edge service providers in the industry giving AIS Services an advantage over the competition. AIS has recruited and retained some of the finest collection experts nationwide to service clients from their San Diego call center. Earlier this year AIS Services, LLC was recognized by Goldline Research as one of the leading Collection Professionals of the United States for 2009 highlighting their continuous pursuit to deliver consistent, unparalleled results to its investors and clients while being sensitive and respectful to consumers.
